

Setting Options

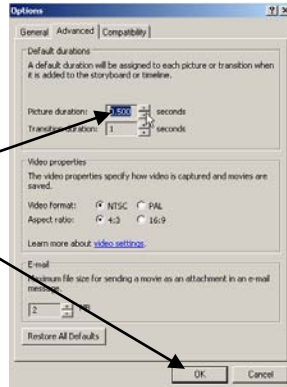

From the main menu, select "Tools", "Options..."

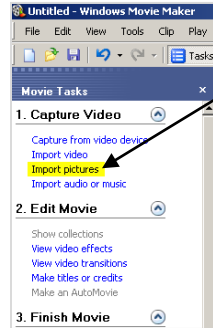

Set the Picture duration to 0.5seconds and click "OK"

Tips and Tricks:

Once the pictures have been added to the timeline (done later) you will be able to click on individual pictures to change its Picture duration

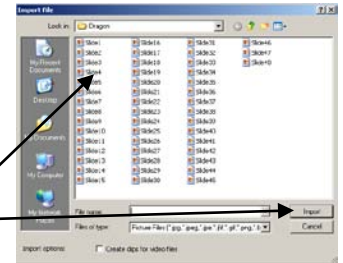

Importing Pictures and/or Music

From the task pane under "Capture Video", select "Import pictures"

To add **music**, select "Import audio or music" from the task pane, then follow the same directions

A browser will appear... browse to the proper folder, select the pictures you wish to use and select "import"

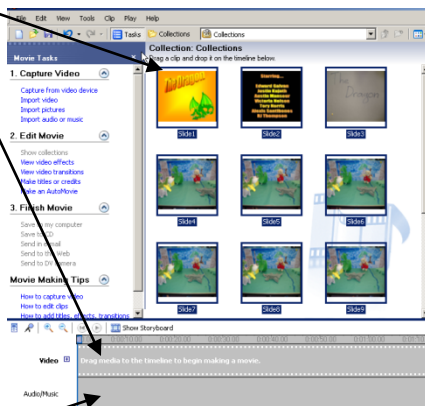

Tips and Tricks:

1. Have all the photos you are using in order and in one folder
2. To select all the pictures in a folder, highlight one picture and then press <Ctrl> + A
3. Once you have started a project on a computer use the same computer each time and do not move the picture/music folder
4. Save your project early and often so you don't lose and information

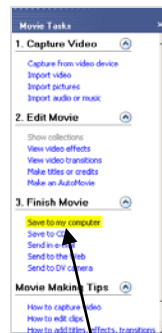

Adding Pictures/Music to the Timeline

Click and drag your pictures from the "Collections" area to the Video timeline. To move all pictures at once, select a picture, then press <Ctrl> +A. You can then drag all the pictures to the timeline.

Music is added the same way...click and drag the music from the collections area to the Audio/Music timeline.

Finishing Movie

1. From the task pane under "Finish Movie", select "Save to my computer"

2. Enter a name for your movie and browse to where you want it saved, then click next

3. Click next again...your movie will be created, finished, and saved to whatever location you selected
