## ActivSlate

### What is it?

An ActivSlate can be used to interact with content just like your ActivBoard or mouse!

### Device Registration

1. Plug ActivHub into USB port
2. Open ActivInspire
3. View Browsers
4. Select Voting Browser
5. Select Device Registration
6. Find ActivSlate image (top center of list)
7. Select Register
8. Select 1 and Next
9. Follow directions as written on the Device Registration Window that now pops up in ActivInspire.

### Charging

Look for the charging cable that came with your ActivSlate - Depending on the model of your device, you may charge by plugging the slate in to the USB port on your computer, or to a wall outlet.
