Problem

Your Cannon Camera is showing all sorts of icons all over the screen during your broadcast.

Solution: Changing the Onscreen Display settings will prevent these icons from cluttering up your broadcast.

Change Settings to Remove Icons

On the Screen of the Camera:
1. Tap the Home icon
2. Scroll to select the Other Settings icon
3. Tap the middle tab at the top of the screen
4. Select Output Onscreen Displays
5. Change the setting to Off
6. Tap the X in the top, right hand corner

Note: Be sure to complete these steps on both Cannon cameras.
