## Drag a Copy

### What is it?

Drag-a-copy is a way to infinitely clone any text, object, or image. Drag a copy can be useful in making graphs, counting objects, or really - anytime you need a LOT of something!

*Check out what happens when you use the select tool to move this quarter while in Presentation Mode! That’s right! Drag a Copy is on!*

### Using Drag a Copy

1. Turn on Design Mode
2. **Right Click** on any image, text, or shape.
3. Select **Drag a Copy**

### Important Notes

- When Drag a Copy has been turned on for an object, your cursor look like this:
  ![Drag a Copy Cursor](image)

- Drag a Copy only works while in **Presentation Mode**

- Drag a Copy will **not work** if the object or image has been **locked**
