### Garmin eTrex

**Main Menu**

- **Power & Back Light**
- **Menu**
- **Zoom**
- **Enter key**
- **Page**

**Note:** The **Enter** key toggles left, right, up, down, & **IN**

### Lead Learner - Marking Waypoints

A **waypoint** is the place where the **cache**, or treasure, is hidden. For students to later find the waypoint using GPS devices, the waypoint must first be **marked**.

**To Mark Waypoints**

1. Physically go outside to the location of your first cache with your GPS unit
2. **Power On**
3. **Menu** (twice)
4. Use the **Enter** key to **scroll** to the right and select **Mark** from the main menu.
5. A default 3 digit name and symbol will be assigned.
6. To accept the waypoint “as is” select **OK**
   **Note:** To change any information before accepting it, use the enter key to scroll around, change and enter information.

### Lead Learners - Deleting Waypoints

**To delete all waypoints**

1. **Power On**
2. **Menu** (twice)
3. Use the **Enter** key to scroll down and select the **Find** icon from the main menu.
4. You will see a list of all Waypoints – Press the **Menu** button (once)
5. Select **Delete**
6. Select **All Symbols**

**To delete a single waypoint:**

1. **Power On**
2. **Menu** (twice)
3. Use the **Enter** key to scroll down and select the **Find** icon from the main menu.
4. **Scroll** down the list of waypoints and use the enter key to select the waypoint you’d like to delete.
5. Select **Delete**

### Students – Finding Waypoints

Once the lead learner has marked the waypoints in the GPS unit, students are ready to find them!

**To Find Waypoints**

1. Go Outside
2. **Power On**
3. **Menu** (twice)
4. Use the **Enter** key to scroll down and select the **Find** icon from the main menu.
5. **Scroll** down the list of waypoints and use the enter key to select the waypoint you’d like to find.
6. Select **Go To**
7. Press the **Page** key to view the compass

### Pressing the **Menu** button twice will return you to the main menu at any time.

Use the **Distance to Next** information on the **Compass** to navigate to your waypoint.
