# Making a Wireless Connection

## Connecting to a Wireless network in Windows 7

### Automatic Connection
1. Click on the “Network and Sharing Center” icon.
2. Click on your network.
3. Click the Connect button.
4. Type the “Security key” when prompted.
5. Click OK.

### Manual Connection
1. Click on the “Network and Sharing Center” icon.
2. Click “Open Network and Sharing Center” at the bottom of the list.
3. Click “Set up a new connection or network”.
4. Click “Manually connect to a wireless network”.
5. Click Next.
6. Type the name of your network.
7. Select a Security type (usually WPA-Personal or WEP).
8. Type your Security Key in the appropriate box.
9. Click Next.
10. Click Close.
11. If necessary, click the wireless networks icon.
12. Click on your network.
13. Click Connect.

### Deleting a Connection
1. Click on the “Network and Sharing Center” icon.
2. Click “Open Network and Sharing Center”.
3. On the left side menu, click “Manage Wireless Networks”.
4. Click on the desired network.
5. Click Remove at the top of the page.
6. Click Yes if prompted.
