## Object Browser

### What is it?

The **object browser** helps you distinguish the layer and order of objects on your page.  
- Annotations go to the **Top Layer**  
- Objects go to the **Middle Layer**  
- The **Bottom Layer** is empty by default  
- If your page has a background it will show in the **Background Layer**

### How do I use it?

1. Open the Browser Bar by clicking >View  
   >> Browsers
2. Select the **Object Browser**
   - You can **change the order** of an item by clicking and dragging an object to the desired location or layer.  
   - Items moved to the background layer **will not be editable** on the page.  
   - If an item is locked you will see the lock symbol. **To quickly lock** or unlock all items, click the Locked button.
