

## Creating a Folder

Create a folder on your desktop to save the codes.

- **Right-click** on Desktop
- Choose **“New” > “Folder”**
- Name the folder

## Downloading the QR Code

When creating your codes on QRStuff.com, choose the **“Download”** output type.

- Browse to the folder you created
- **Rename the file** to match the code

## Selecting the Codes

After all your codes have been created, you will be ready to print.

- Open the folder in which you saved the codes
- Select the codes you wish to print out
- Click the **“Print”** button

**Note:** **“Ctrl” + “A”** will select all files at once.

## Printing the Codes

A print window will open. From this window:

1. Choose the **printer** you wish to print to
2. **Uncheck** the **“Fit picture to frame”** box
3. Choose the **size** you wish the codes to be. Your 2 best options are:
  - a. 3.5 x 5 in (4 codes/page)
  - b. Wallet (9 codes/page)
4. Select the **“Print”** button

Once your codes have been printed, cut them apart and use them as you wish.
