Changing the Background

1. Right-click on the Background of the Page
2. Click "Set Background"
3. Choose Background fill options

**Fill Effects**
- Solid fill sets the background the chosen color
- Gradient fill sets the background as a blend of two select colors as a transition from one color to the other
  - The Style can be set to allow the user to control the direction of the gradient transition
- Pattern fill sets the background with one of many different patterns and two chosen colors
- Image fill sets the background as an image chosen and inserted by the user (Note: the image inserts based on its currently resolution, small images will tile, large images may not fit completely on the page)

**Pattern Options**
- Foreground color
- Background color
