**Overview**

The Magic Pen enables the use to create written text and drawings that slowly fade from the screen, open a magnification windows, or open a spotlight windows.

### Activating the Magic Pen

1. Click the Pens tool
2. Click the Pen Types button
3. Click Magic Pen from the list

### Fading Text/Objects

1. Select the Magic Pen from the Pen Type list
2. Write or draw desired objects
   a. Note: Drawing a rectangle or circle may inadvertently activate the magnification or spotlight window. You may need to make a rectangle or circle incomplete to avoid this from happening.

### Magnification Window

1. Select the Magic Pen from the Pen Type list
2. Write or draw a rectangle on the screen
3. A magnification window will activate
   a. Move the magnification window by dragging the box around the screen by the outer edge
   b. Resize the magnification window by clicking and dragging on the central portion of the box
   c. Close the magnification window by clicking the "X" on the top-right corner of the box

### Spotlight Window

1. Select the Magic Pen from the Pen Type list
2. Write or draw a circle on the screen
3. A spotlight window will activate
   a. Move the spotlight window by dragging the circle around the screen by the outer edge
   b. Resize the spotlight window by clicking and dragging on the central portion of the circle
   c. Close the spotlight window by clicking the "X" on the top-right corner of the circle

### Customizing the Magic Pen

1. Select the Magic Pen from the Pen Type list
2. Click the Properties side tab
3. Select Fill Effects
4. Change the "Fade after (seconds)" to increase or decrease the speed in which the Magic ink fades from the screen
5. Select Line Style
6. Change the pen color and thickness as needed
7. To make the changes permanent for SMART Notebook, click the "Save Tool Properties" button on the Properties side tab
