SMART Ink Options

Click the SMART Ink drop-down arrow on the SMART Ink toolbar (only appears when connected to a SMART Board or Slate).

**Turn on SMART Ink** – disables SMART Ink for current program. SMART pens will act like a mouse cursor. They will not draw within the active program.

**Select** – activates the mouse cursor even if a pen is currently out of the pen tray.

**Pen** – activates the desired pen color and thickness. Any object contacting the SMART Board will serve as a drawing tool.

**Calligraphic Ink** – converts the pen tool to write in calligraphy type style

**Highlighter** – allows you to write with a highlighter in the currently program.

**Eraser** – activates the erase to erase any SMART Ink

**Capture** – screen captures the current page with SMART Ink writings and inserts it into a SMART Notebook page

**Clear Ink** – erases all SMART Ink from the page

**Help** – opens an internet browser and navigates to the SMART Ink help section of the SMART Technologies website.

**About SMART Ink** – displays the technical data about the version of SMART Ink installed on the computer
