What is SMART Ink?
SMART Ink allows you to write and draw over any open program on your computer. This allows you direct focus to specific area or concept on the screen. To activate SMART Ink, simply pick up a pen and begin writing.

Examples

SMART Ink Commands
- allows you to move the written SMART Ink to a different location on the screen
- deletes the currently selected SMART Ink notation(s)
- converts the handwritten text to typed characters and inserts the text into desired location
- allows you to Copy, Cut, or Delete the selected SMART Ink notation(s)
