Windows 10

**Description**

Windows 10 was designed for those familiar with Windows 7, so many features are found in the same place. If you are familiar with Window 10, you may notice a few differences between the way your district computer and personal computer function.

**Some Key Features:**
- Chrome is the default Web Browser.
- Websites, such as Kronos, that require a specific browser will now open automatically in the correct browser.
- The Windows App Store is currently blocked.

**Start Menu Tiles**

The Windows 10 Start Menu now offers a tiled view of shortcuts to apps and weblinks. LCISD has created a few groups of tiles to give you quick access to popular district tools. These are locked and cannot be adjusted.

**The Start Menu**

- **Your Account**
  Click here to lock your computer or sign out of your profile without shutting down your computer.
- **List of Programs**
  Access commonly used and recently added programs.
- **Power / Shutdown**
  Tap here to properly shut down or restart your computer.
- **All Apps/All Programs**
  View a list of all the programs (apps) installed on your computer in alphabetical order. Right click on any app to add it to your Start Menu, and click “More” to pin the program to your taskbar.

**The Taskbar**

- **Start Button**
  Toggle through open programs.
- **Search**
  Search for programs, functions, settings, and the web.
- **Wi-Fi**
  View available wireless networks
- **Touch Keyboard**
  New classroom laptops have touch screens. Tap this icon to pull up an onscreen keyboard.
