

Backing up Your Library

To preserve the educational resources you've created and bought this year, it's a great idea to back up your iTunes library.

To back up your iTunes library to a flash drive:

1. Navigate to the main iTunes folder (under "my music").
2. Drag and drop the iTunes folder onto your flash drive.

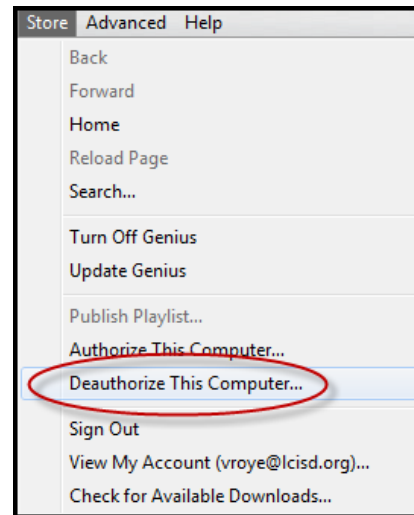

Deauthorizing Your Computer

Since there is a very good chance that the computer in your classroom will be imaged over the summer, it is very important that you deauthorize your computer (after you back up your library).

To Deauthorize Your Computer Click:

1. Store
2. Deauthorize Computer
3. Enter your username and password
4. Deauthorize

IMPORTANT!!

Be sure to back up your library **BEFORE** deauthorizing your computer.

Once you return in August, you'll need to replace the iTunes folder on your computer with the iTunes folder on your flash drive, and then reauthorize your computer in order to use your iTunes account.
